## Project Highlights:

Fidelity Investments is a 6,000 square foot outparcel building on the property of Pittsford Plaza, which is located in the heart of one of the most affluent suburbs of Rochester, NY.

This project was finished on time, underbudget and took seven months from the start of design to completion of construction.

Wilmorite works with companies on high-scale projects as well as low-scale ones such as Fidelity. These companies worked together to design and build the shell of the building.
